

the ONLI'
third 'Messenger of Love' from the Divine Symbols™
... sacred geometry for the new millennium™

This symbol completes a trilogy of symbols creating the statement 'Infinite Love in THE ONE & ONLI' Heart there is'.

Symbols are a language which holds within them 'packed information'. When symbols come through into this reality it is because the timing is 'right' for that particular vibration. They often come with a 'set of instructions', albeit through the filters of the receiver. Below I am sharing much of what I have understood, heard, felt, received and translated. By spending time meditating with a symbol one begins to embody it and it will speak relevant to how it can best serve you within the framework of its vibration.

Remember: **The greatest complexity can expressed in absolute simplicity.** When first viewing one of the Divine Symbols™ ...sacred geometry for the new millennium™ you will be struck by its simplicity and elegance. Do not let that mislead you. They communicate and radiate their frequencies through many dimensions and realities, including into and through each of us and all life everywhere, wherever it is manifested.

The following information is in no particular order. I hope that it is helpful in explaining some of what this magnificent messenger has come to offer each of us at this amazing time in which we are living.

- This symbol is different than either of the first two symbols in that it asks us to become involved (active)
- I believe that it is a symbol/vibration to assist us in creating the 5th ether (first 4 were given to us by Spirit). The 5th ether must be created by humans. It is being created by selfless acts of loving kindness with no expectation of personal gain or reward. It is the ether of Love.
- It is a symbol of ethics
- The accent and spelling of the word 'only' is changed to Onli' for reasons of perception shift and energy shift. The accent is moved to the last syllable so that the energy is lifted upward through the 'i' to the 'dot' above the 'i'. This directs the powerful movement of energy up the cylinder of the 'i' to the sphere of the dot, absorbing the focused energy and softening it, then radiating it outward. The cylinder is an active/male energy and the sphere is a receptive/female energy.
- It is a symbol of joyous transformation and transmutation of that which is still unresolved
- Asks us to explore 'ethics': patience, impeccability, walking our talk, honesty, etc while remembering the basics of Infinite Love and The One.
- When we act ethically we are filled with spontaneous joy
- The Onli' asks us to have a new/different/expanded relationship with ethical action
- It is about harmonious creation/joyous creation
- It asks us to move from 'holding a vibration' to creating responsibly with awareness and ethical action... to become beings of conscious creation.
- If unethical, the result will be an unethical creation. No longer can we blame others for the ills of that around us.
- If one chooses this path of courage, it will bring to each that which is still unresolved. We will be shown or drawn to that which is still seeking transmutation.
- We must do the work. This is not a path for those looking to have personal evolution work done for them.
- This symbol, as also true of the others, will continue to open.
- Its form represents the Divine Masculine (Christic) and the Divine Feminine (Mari).
- This form creates four cones of full spectrum light (light beyond our knowing or experience) ... a diamond beyond our knowing

- All vibrations come together in the infinity point (represented by the small black ball in the center. This black ball represents the Infinity Point, or void/emptiness/Ocean of Love
- All vibrations move into the infinity point (implosions) and move out from the same point (explosions)
- Energy/vibration moves infinitely IN and infinitely OUT
- ALL life is created from and returns to the infinity point... 'All in the nothing, nothing in the ALL' ... can be called 'zipped time'. There is no 'happening' until there is thought or, 'the story is in the telling' (words given Antonia in 1995)
- Each extension represents a facet of life/creation and also the flow from nothingness to form and back again. The top left segment (Infinite Love symbol) represents ALPHA or the beginningless beginning, the top right represents SPIRIT, the bottom left represents MATTER and the bottom right represents OMEGA, the endless end. When moving from the top left to the top right to the bottom left to the bottom right and back up to the top left and so on you will see the movement into and through form back to the beginningless beginning and so on ad infinitum.
- As we move into a world of increased awakening/awareness and conscious responsibility/creation, the symbol reminds us that the need to carry 'karma' from life time to lifetime is unnecessary as the 'feedback loop' gains momentum and our stuff/thoughts/actions are instantly returned to us.
- Asks of each of us: Spiritual Discretion and Discernment to move through the proliferation of material available
- The four segments are in 90 degree angles creating an equilateral cross. They are in the positions of 10:30, 1:30 & 4:30, 7:30 (imagine standing IN the center of a clock with 12 o'clock directly in front of you. This also works if you need to work with 12 o'clock directly above you)
- Top two symbols move CCW
- Bottom two symbols move CW
- At the same time each Infinite Love symbol moves in its correct direction: Infinite Open Heart CW, Golden Infinity CCW). At the same time, while we need only to 'know' this: the symbols also move diagonally as well as other configurations as shown Antonia, though not all decipherable at this time.

- The Onli' is about joyous/loving transmutation
- The Onli' is about joyous/loving creation
- The Onli' is about JOY
- The Onli' is about CELEBRATION
- Definition of Transmutation: change: a change, or the process of changing, from one form/substance/nature/state to another; change of one element into another: Physics – the transformation of the atom of one chemical element into the atom of another by disintegration or nuclear bombardment; conversion to gold : history – the supposed conversion of base metals into gold or silver by alchemy; metamorphosis.
- The ONLI' is the *Golden Phoenix of Transmutation* assisting human evolution/metamorphosis beyond our wildest imagination, knowing and understanding.

The above information is presented by Antonia Albano, Founder of World Love Project™ and receiver of the Divine Symbols ...sacred geometry for the new millennium™. This information is her understanding-to-date and is not intended to be presented as the final word. Each individual will develop their own understanding as the symbol speaks to them.

This symbol belongs to the world. Please share this wherever it is called. Be sure to give appropriate credit and reference to website, including a copy of the above understandings in any reference or class where it is presented.

Antonia can be contacted at 540.461.1401 or by email at : antonia@southriverhighlands.com for more information on the Divine Symbols™ ...sacred geometry for the new millennium™, to invite as a speaker or facilitator of workshops. Antonia currently lives in the Shenandoah Valley of Virginia. More information on the Divine Symbols ...sacred geometry for the new millennium™ can be found at www.WorldLoveProject.com or www.southriverhighlands.com/divine.html. Information on the annual Celebration Of Love event in Virginia each year in February at her farm can be found at: www.CelebrationOfLove2009.com (year changes each year mid January).
